Disclaimer: The purpose of this briefing is to provide a ***Regional*** weather threat assessment and is meant as a general overview. County/Parish decision makers should consult their local NWS forecast offices for the latest detailed, local weather information. To find your local NWS forecast office, go to www.weather.gov/srh and click on the "Weather Forecast Offices" tab and click on the map for your area.

FEMA Region 6 Weather Threat Briefing

Sunday, January 14, 2018

Issued: 0800 CT

Day 1 Weather Impacts: *Light snow accumulations of up to one inch possible over extreme NE OK and N AR today.*

National Weather Service

*Southern Region Headquarters
Regional Operations Center
Fort Worth, TX*

Prepared by: Jennifer McNatt
817-978-1100 x 147

Key Points

Today

- Light snow accumulations of up to one inch possible over extreme NE OK and N AR today

Monday - Tuesday

- Light snow possible over northern portions of the Region by midday Monday
- Wintry mix of precipitation is expected to begin in the evening over AR, SE OK & NE through Central TX and is likely to continue overnight for these same areas as well as spreading into N LA and S-Central TX
- Wintry mix of precipitation is expected to be ongoing Tuesday morning from S AR, N LA, NE through Central and S-Central into SW TX; travel impacts likely even with little accumulations expected
- Winter weather chances continue to slowly sink southward Tuesday; expected to remain over S LA and SE through S-Central TX through late Tuesday night
- Right now, it appears that overall amounts should be light (up to 1" of snow and 1/10th inch of ice; travel impacts still likely across these areas, especially Tuesday morning

Wednesday - Thursday

- Wintry precipitation remains possible over SW into S-Cntrl TX Wed night and into SE through S-Cntrl TX Thursday morning; little to no accumulations expected

FEMA Region 6 Threat Matrix

Jan 14, 2018 through Jan 18, 2018

	SUN	MON	TUE	WED	THU
Heavy Rain / Flash Flooding					
Fire Weather					
Winter	Extreme NE OK, N AR	Midday: N OK, N AR, N NM	Morning: S AR, N LA, NE through Cntrl & SW TX	SW & S-Cntrl TX	S-Cntrl & SE TX
		Evng: AR, SE OK, NE & N-Cntrl TX			
		Overnight: S AR, N LA, NE & Cntrl TX	Evng: S LA, SE through S-Cntrl TX		
River Flooding					

	No Weather Threats Expected
	Very Common – Happens Often
	Common – Happens Frequently
	Uncommon – A Few Times a Year
	Rare – Once Every 1-5 Years
	Very Rare – Once Every 5-10 Years

For more details on the colors in the threat matrix refer to the last slide in this briefing.

5-Day Precipitation Forecast & River Flood Status

River flooding is not expected in the next five days.

See <http://water.weather.gov/ahps> for the latest on river flooding

The criteria for the color codes in our briefings is below, please provide any feedback to sr-srh.roc@noaa.gov.

Weather "Threat" Matrix			
Color	Definition	Criteria	Example(s)
Green	Very Common Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Little Inconvenience to Daily Routines	Severe: Marginal Risk from SPC Flooding: Minor flooding expected over localized areas Tropical: None Fire Weather: No Watches/Warnings, fuel moisture above 10% or green up active	<ul style="list-style-type: none"> Thunderstorms expected over LA this afternoon; a few may produce winds to knock down a few trees Something that happens almost every day in a particular season such as <u>seabreeze</u> storms in coastal TX
Yellow	Somewhat Common – Happens Frequently Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Some Inconvenience to Daily Life	Severe: Slight Risk from SPC Flooding: Nuisance flooded expected for a widespread area, or Minor flooding expected over isolated areas Tropical: A weak tropical wave expected to move towards or near any coastline Fire Weather: Red Flag Watches/Warnings and/or SPC outlines enhanced or critical fire outlook	<ul style="list-style-type: none"> 2-3 inches of rainfall expected over central AR today and tonight; some minor (brief) street flooding possible Scattered severe storms possible, one or two tornadoes expected, along with reports of strong winds/wind damage and ~1" hail
Orange	Uncommon – A Few Times a Year Safety: Often Threatening to Life and Property, Some Damage Unavoidable Impact Potential: Typically Results in Minor Disruption to Daily Life	Severe: Enhanced Risk from SPC Flooding: Minor flooding expected over a widespread area (including urban locations), or Moderate flooding expected over isolated areas Tropical: A Tropical Storm expected to move towards or near any coastline Fire: Critical fire outlook for more than 2 consecutive days, Warnings for 2 or more consecutive days, D3-D4 drought conditions	<ul style="list-style-type: none"> A snow/sleet mix is expected to move through or near the DFW area tomorrow morning; travel impacts likely Numerous severe storms possible, a few tornadoes possible along with several reports of wind damage along with damaging hail Some large fires reported, burn bans advertised, critical conditions expected
Red	Rare – Once every 1-5 Years Safety: Extensive Property Damage Likely, Life Saving Actions Also will be Needed Impact Potential: Will likely result in Large Disruption to Daily Life	Severe: Moderate Risk from SPC Flooding: Moderate flooding expected over a widespread area (including urban locations) Tropical: A Hurricane expected to move towards or near any coastline Fire: Large areas of critical conditions for 2 or more days, Warnings for 3 or more days, Severe to extreme drought	<ul style="list-style-type: none"> A Category 1 hurricane will be moving towards the NW Gulf in the next few days Widespread severe storms likely, strong tornadoes, widespread wind damage, and destructive hail Large fires ongoing throughout the area with critical fire weather conditions expected to continue
Purple	Very Rare – Once Every 5-10 Years Safety: Property Damage Unavoidable, Immediate Action to Save Life will be Needed Impact Potential: Typically Results in Long-Lived Widespread Major Disruption to Daily Life	Severe: High Risk from SPC Flooding: Major flooding expected over a widespread area (including urban locations) Tropical: A Major Hurricane (Cat3 or greater) expected to move towards or near any coastline Fire: Large area of critical conditions for 2 or more days, Warnings for 3 or more days, Long term (months) of severe to extreme drought	<ul style="list-style-type: none"> A Category 4 hurricane is headed towards the SE LA; major storm surge, flooding and damaging winds anticipated to begin tomorrow Widespread severe storms expected, tornado outbreak probable with long-lived, very widespread and particularly intense storms
